

Design D3 Line

Tobias Garritsen, 10779582

November 2017

Design choices

- The design choices in margin are based on the data so it is represented in a (semi-)pretty manner.
- The colours are chosen by being very distinctive and red and blue are associated with hot and cold, so max and min temperature.
- The thickness of the lines is very thin as the lines are fairly close to each other and it would be a bit messy if the lines were thicker.
